Chennai, India | 6369347778 | bharathkumaresen11@gmail.com | [LinkedIn](#) | [Portfolio](#)

Data Analyst with 1 year of experience delivering data-driven insights using SQL, Python, Excel, and Power BI. Skilled in data transformation, dashboard development, customer analytics, and business reporting. Experienced in applying AI and Computer Vision techniques, including PPE detection, facial recognition, and person detection, to solve real-world operational challenges. Adept at translating complex data into actionable insights that support business decision-making.

TECHNICAL SKILLS

- | | | | |
|--------------------------|---------------------|----------------------|-----------------------------|
| • Power BI Desktop | • Advanced Excel | • Tableau | • Data Cleaning |
| • Power BI Service | • SQL | • Python | • Data Storytelling |
| • Power Query (M- Query) | • MySQL | • Data Modelling | • Python (Pandas, NumPy) |
| • DAX | • SQL (Postgre sql) | • Data Visualization | • Yolo |
| | | | • Facial recognition |
| | | | • Computer Vision Analytics |

WORK EXPERIENCE

Data Analyst | Prowesstics,Chennai

06/2025 – Present

- Built and maintained Power BI dashboards to track sales KPIs, customer segmentation, and purchase trends, supporting weekly business decisions.
- Extracted and transformed data from MySQL/Postgresql using advanced SQL (CTEs, window functions), improving data readiness for reporting.
- Performed Market Basket Analysis on 50K+ transactions using Python, identifying product associations to support cross-sell strategies.
- Developed Product Purchase Comparison dashboard using Power BI (DAX, Power Query) to identify underperforming SKUs and demand trends

Tools used: Power BI desktop, Power BI service, Power query, DAX function, Sql(postgresql),Excel

Data Analyst Intern | Forage (Virtual Internship)

10/2024 – 12/2024

- Processed raw client data in Excel using VLOOKUP, Pivot Tables, and conditional formatting to produce structured datasets ready for visualization.

Tools used: MS Excel, Vlookup, Pivot Table, MS Word

PROJECTS

Customer Purchase Behaviour Analysis & Product Performance Dashboard

- Analyzed 50K+ transactional records using SQL and Python to identify customer purchase patterns and product associations
- Applied Market Basket Analysis to compute support, confidence, and lift (up to ~2.4), identifying high-value cross-selling opportunities
- Built interactive Power BI dashboards to monitor product performance across regions, time periods, and customer segments
- Developed DAX measures (YoY growth %, running totals) to track key performance indicators and trends
- Performed customer segmentation using SQL window functions based on purchase frequency and transaction patterns
- Generated actionable insights to support product bundling, inventory planning, and business decision-making

PPE Compliance & Safety Dashboard

- Built Power BI dashboards using AI-generated detection data stored in a database
- Developed KPIs for PPE compliance (helmet, vest), total violations, and site-level safety metrics
- Created safety monitoring visuals for events such as fire/smoke alerts, fall incidents, and restricted zone breaches
- Designed zone-wise and hourly analysis to identify high-risk areas and time periods
- Implemented event and violation logs with evidence tracking for audit and monitoring

EDUCATION

Bachelor of Commerce

06/2021 – 04/2024

Jaya College of Arts & Science

ACHIEVEMENTS

- HackerRank – SQL Gold Badge.
- Tata Data Visualization: Empowering Business with Effective Insights (Forage)
